PROFESSIONAL SUMMARY

Btech Computer Science graduate with hands-on experience in **data analysis, exploratory data analysis, machine learning, data preprocessing, predictive modeling, and dashboard development**. Proficient in **Python, SQL, Power BI, Pandas, NumPy, and Scikit-learn**, with practical experience developing machine learning models, preprocessing pipelines, interactive dashboards, and Streamlit-based prediction applications. Seeking entry-level opportunities in **Data Analytics, Machine Learning, and data-driven technology roles**.

EDUCATION

Accurate Institute of Management and Technology [AKTU],

Bachelor of Technology — Computer Science & Engineering | CGPA: 7.5 |

Greater Noida, Uttar Pradesh

2022–2026

Relevant EXPERIENCE

Tata Group — Data Analytics Job Simulation on Forage | (Internship)

Sep 2025 – Oct 2025

- Completed a data analytics Internship involving **AI-powered data analytics and strategy development** for the Financial Services team at Tata iQ.
- Conducted **Exploratory Data Analysis (EDA)** to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified a **predictive modeling framework** for assessing customer delinquency risk, including model logic and evaluation criteria.
- Designed an **AI-driven collections strategy** using agentic AI and automation while incorporating ethical AI principles, regulatory compliance, and scalability.

PROJECTS

Forest Fire Prediction System | Python | Pandas | NumPy | Scikit-learn | Streamlit

- Developed and trained a **Ridge Regression** model using the Algerian Forest Fires dataset to predict **Fire Weather Index (FWI)**.
- Applied **data preprocessing, feature engineering, and StandardScaler** to prepare features for machine learning.
- Developed a **Streamlit prediction dashboard** supporting single and batch predictions through CSV upload.
- Implemented user input handling, model inference, and result visualization within a production-oriented application workflow.
- Used **Joblib and Pickle** for model persistence and deployment readiness.

Housing Price Prediction | Python | Pandas | NumPy | Scikit-learn

- Developed a **machine learning regression model** using the California Housing dataset to predict housing prices.
- Performed **data preprocessing and EDA** using Pandas and NumPy.
- Applied **SimpleImputer, OneHotEncoder, and StandardScaler** for missing-value handling, categorical encoding, and feature scaling.
- Implemented **StratifiedShuffleSplit** and a **ColumnTransformer-based ML pipeline** for numerical and categorical features.
- Trained a **RandomForestRegressor with hyperparameter tuning** and used Joblib for model persistence.

E-commerce Sales Insights | Power BI | SQL

- Developed an interactive **Power BI dashboard** to analyze online sales data and track key performance indicators.
- Built a comprehensive sales-tracking dashboard to monitor performance trends and support data-driven inventory decisions.

TECHNICAL SKILLS

Programming: Python, SQL, Excel

Data Analysis: Pandas, NumPy, EDA, Data Preprocessing, Data Visualization

Machine Learning: Scikit-learn, Ridge Regression, Random Forest, Feature Engineering, ML Pipelines

BI & Visualization: Power BI, Matplotlib

Development & Tools: Streamlit, Jupyter Notebook, VS Code, Joblib, Pickle, BeautifulSoup

Foundations: Probability, Statistics
