Ritik

Aspiring Data Analyst & ML Enthusiast skilled in Python, SQL, and Power BI

+919315464847 | 03ritik.t@gmail.com | https://www.linkedin.com/in/ritiktiwari123/ GitHub/ritiktiwari2004

Education :-

Accurate Institute Of Management And Technology [AKTU] **Greater Noida, Uttar Pradesh**

Bachelor of Technology [CSE] CGPA : 7.4(till 7th semester) **2022-2026**

Work Experience :-

Tata Group Data Analytics Job Simulation on Forage **26/ 9/2025 – 6/10/2025**

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modelling.
- Proposed and justified an initial no-code predictive modelling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.

Projects :-

Ecommerce Sales Insights [Power BI | SQL]

- Created interactive dashboard to track and Analyse online sales data
- Created a comprehensive online sales tracking dashboard that monitored key performance indicators, resulting in an increase in forecasting accuracy by 30%, thus enhancing inventory management and reducing stockouts.

Forest Fire Prediction System [Machine Learning | |Pandas, NumPy| Streamlit]

- Designed and trained a **Ridge Regression model** on the Algerian Forest Fires dataset to predict Fire Weather Index (FWI).
- Applied preprocessing techniques such as **StandardScaler and feature engineering** for improved model performance.
- Developed a **Streamlit-based dashboard** supporting single and batch predictions via CSV upload.
- Implemented user input handling, model inference, and result visualization in a production-like environment.
- Used joblib and pickle Technique for model persistence and deployment readiness.

Housing Price Prediction [Python(pandas, NumPy) | Scikit-Learn |Machine Learning]

Developed a machine learning model using the California Housing dataset to predict housing prices.

- Performed data preprocessing and EDA using Pandas, NumPy.
- Applied Simple Imputer for missing values, OneHotEncoder for categorical encoding, and StandardScaler for feature scaling.
- Utilized StratifiedShuffleSplit to create balanced train-test splits.
- Built a robust ML pipeline using ColumnTransformer to handle categorical and numerical features.
- Implemented RandomForestRegressor with hyperparameter tuning.
- Used joblib for model persistence and deployment readiness.

Achievement :-

- **IBM Certifications**:-

  Earned Data Science 101 Certificate by IBM **15 September 2025**

  Earned Data Science Methodology Certificate by IBM **16 September 2025**

- **Tata Certifications:-**

  Earned GenAI Powered Data Analytics Job Simulation Certificate **6 October 2025**

Technical Skill :-

- **Programming Languages**: Python, SQL
- **Frameworks/Libraries:** NumPy, Pandas, Matplotlib, Beautiful-Soup, Scikit-learn
- **Developer tools:** vs code, jupyter notebook, power BI
- **Other skills:** Probability, Statistics, Feature-Engineering, EDA
